IN THE CLAIMS:

Please cancel claims 2 and 12, and amend claims 1, 6, 8 and 11 as follows.

1. (Amended) NOx removal apparatus comprising:

a support [made of a mixture] including <u>a mixture of</u> manganese dioxide and copper oxide the support including at least sixty weight percent manganese <u>dioxide</u> and at least about ten weight percent copper oxide; and

an alkali material combined with the support;

the support and the alkali material being combined for NOx removal.

(1)

6. (Amended) The apparatus of claim 1, wherein the support <u>includes</u> <u>particles of the manganese dioxide and copper oxide, the particles [have] having</u> an internal surface area of at least 150 meters²/gram.

D

- 8. (Amended) The apparatus of claim 1, wherein the support includes a first group of particles of manganese dioxide and copper dioxide [is made of the support], and wherein the alkali material is on a second group of particles, and wherein the first and second groups of particles are mixed together.
- 11. (Amended) An adsorbent for removing NOx from a gas, the adsorbent comprising:

support particles made of a mixture including manganese dioxide and copper oxide, there being at least sixty weight percent manganese dioxide and at least about ten weight percent copper oxide; and

an alkali material;

the support particles being impregnated with the alkali material.
